This presentation includes “forward-looking statements” as defined by the Securities and Exchange Commission. We make these forward-looking statements in reliance on the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, included in this presentation that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements. This includes, without limitations, our long-term growth targets. These forward-looking statements are based on assumptions which we believe are reasonable based on current expectations and projections about future events and industry conditions and trends affecting our business. However, whether actual results and developments will conform to our expectations and predictions is subject to a number of risks and uncertainties that, among other things, could cause actual results to differ materially from those contained in the forward-looking statements, including without limitation, the risk factors described in Item 1A of Part I of our 2020 Annual Report on Form 10-K and other reports that we file with the SEC from time to time, and the following:

- The accuracy of our assumptions on which our growth targets are based;
- Our ability to obtain adequate cost recovery for our utility operations through regulatory proceedings and favorable rulings on periodic applications to recover costs for capital additions, plant retirements and decommissioning, fuel, transmission, purchased power and other operating costs, and the timing in which new rates would go into effect;
- Our ability to complete our capital program in a cost-effective and timely manner;
- Our ability to execute on our strategy;
- Our ability to successfully execute our financing plans;
- Our ability to achieve our greenhouse gas emissions intensity reduction goals;
- Board of Directors’ approval of any future quarterly dividends;
- The impact of future governmental regulation;
- The effects of inflation and volatile energy prices; and
- Other factors discussed from time to time in our filings with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time-to-time, and it is not possible for us to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. We assume no obligation to update publicly any such forward-looking statements, whether as a result of new information, future events or otherwise.

Integrated Utility with Strong Growth Outlook

\$3.2+ billion

Capital Investment 2021-2025

- Incremental projects likely
- Additional growth opportunities

5% to 7%

Long-term EPS growth target¹

5%+

Annual dividend growth target²

50-60% payout target

- Integrated pure-play utility
- Diversified and complementary electric and gas mix
- Stable, growing and constructive service territories
- Strong financial position and liquidity
- Robust capital plan with timely recovery

¹ 2023 to 2025 compound annual growth rate, off 2022 base

² Future dividends subject to board approval

Black Hills Overview and Strategy

READY TO SERVE

We take a programmatic approach to maintaining, upgrading and replacing critical infrastructure to better serve our customers and communities.

Black Hills Corp. Overview

Integrated Pure-Play Utility

Integrated Electric Utility

Electric Utilities

Generation, transmission and distribution (39% of total assets)

Power Generation

Electric capacity largely contracted to our utilities (5% of total assets)

Mining

Efficient fuel supply for mine-mouth generation through long-term contracts (1% of total assets)

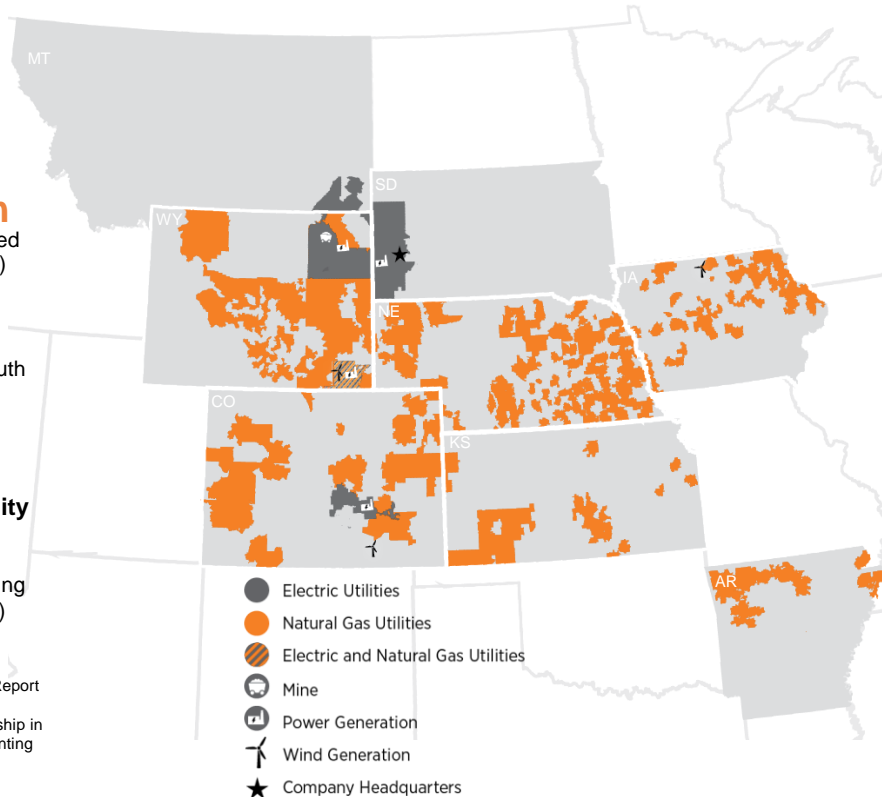

Full-service Natural Gas Utility

Gas Utilities

Transmission, distribution, sourcing and storage (54% of total assets)

Note: information from 2020 Form 10-K Annual Report

* Generation total includes 49.9 percent ownership in Colorado IPP owned by a third party, representing approximately 100 megawatts

Diverse Utility Mix with Strong Financial Base

8 stable and growing states

1.3 million utility customers

1.4 gigawatts* generation

8,900 miles electric lines

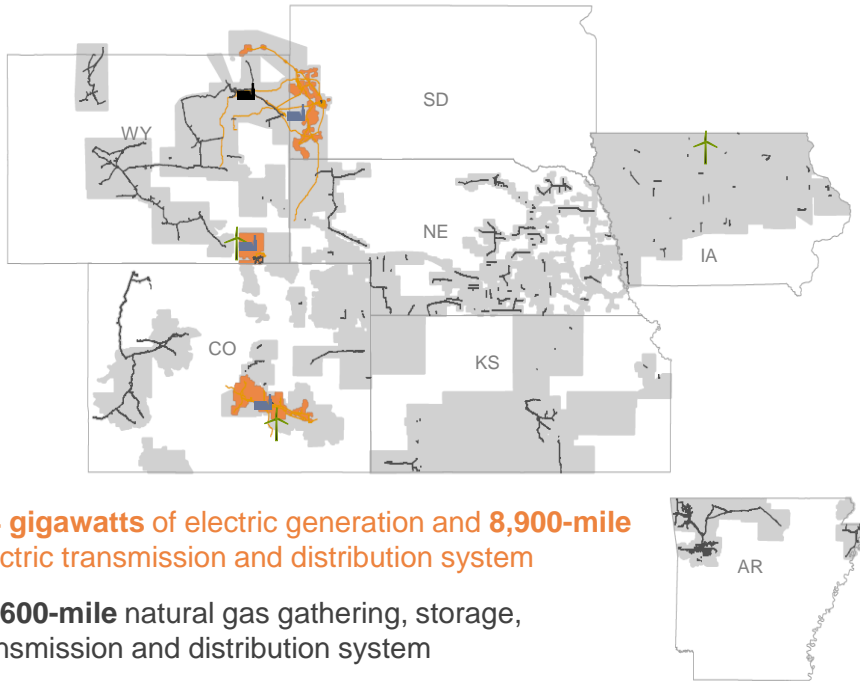

46,600 miles natural gas lines

\$8.1 billion assets

\$4.4 billion rate base

Strategic Diversity

Large Systems Across Stable, Growing and Constructive Jurisdictions

1.4 gigawatts of electric generation and **8,900-mile** electric transmission and distribution system

46,600-mile natural gas gathering, storage, transmission and distribution system

Complementary Seasonality of Electric and Gas Business Mix

Low-risk Utility Investment

Regulated and Integrated

Diverse and Balanced Business Mix

Less than 12% of Revenue From Coal

Note: Information as of Dec. 31, 2020

*88% of total revenues derived from natural gas utilities, natural gas-fired generation, renewables and other non-coal related activities and services

Disciplined Growth Plan with Upside

Capital Forecast

Incremental Projects

Other Earnings Drivers

\$600+ million annual investment; \$3.2+ billion 2021-2025

- ▲ Electric generation and transmission projects
- ▲ Large natural gas pipeline and storage projects
- ▲ Additional long-term investment programs
- ▲ Investments to comply with safety requirements

Pursuing Profitable Growth

- ▲ Data center, blockchain and technology growth
- ▲ Population migration into our territories
- ▲ Innovative solutions, products and technologies, including renewables
- ▲ Cost discipline and focus on continuous improvement

Investing for Customer Needs Drives Growth

\$3.2+ Billion Capital Investment Forecast (2021-2025)

Utility Investment

Customer Focused

Timely Recovery

* Growth Capital – generates immediate revenue on customer connections

Minimal Lag Capital – capital investment with regulatory lag of less than one year or incurred during expected regulatory test periods; includes nonregulated investment

Rider Eligible Capital – capital investment recovered through state specific tariffs and meets Minimal Lag Capital definition

Other Capital – capital investment recovered through standard rate review process; includes corporate

Customer-Focused Incremental Opportunities

Ready to Serve as the Energy Partner of Choice – Growing Long-term Value for All Stakeholders

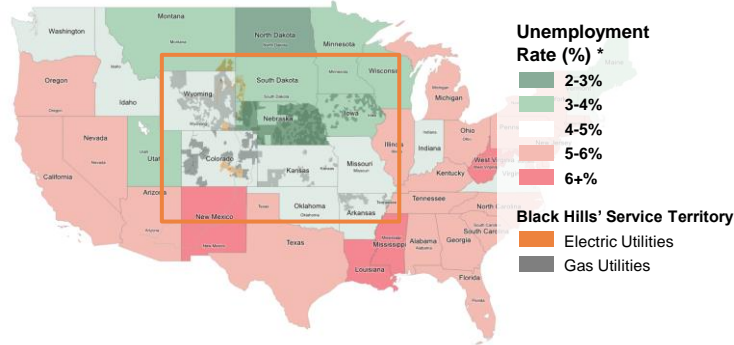

Stable and Growing Service Territories

Better Than Average Employment *

Strong Customer Growth Above State and National Averages **

Above Average GDP Growth**

(Trailing Four Quarters Average Growth)

* Unemployment information from U.S. Department of Labor; mapping from S&P Global Market Intelligence

** Total population growth from 2018 to 2020 and GDP based on data from Bureau of Economic Analysis (bea.gov)

Responsibly Reducing GHG Emissions

Integrating Renewables and Delivering Cleaner Critical Generating Capacity Electric Operations

Since 2005:

✓ 30% by 2020

- ✓ Retired 123.3 megawatts of coal generation
- ✓ Added 281.5 megawatts of owned renewable wind resources

■ 40% by 2030

- Convert 90-megawatt coal plant to gas at end of engineered life (*Neil Simpson II in 2025*)
- Add renewable and battery resources (*200MW PPA to be added in CO by 2024*)

■ 70% by 2040

- Convert or replace remaining coal plants at end of engineered lives (*see footnote below*)
- Add renewable and battery resources

Natural Gas Utilities

Since 2005:

✓ 33% by 2020

- ✓ Replaced at-risk and aging pipeline materials

■ 50% by 2035

- Replacing at-risk and aging pipeline materials
- Develop and integrate RNG opportunities, integrate leak detection and emissions reduction technologies and processes

Read more about our sustainability progress and commitments at:

www.blackhillsenergy.com/sustainability

- ✓ **New** SASB disclosures
- ✓ **New** NCSI disclosures
- ✓ 2020 AGA and EEI quantitative reports
- ✓ 2020 Corporate Sustainability Report

Note: Goals are based on reduction in greenhouse gas emissions intensity since 2005. Achievement of these goals assumes coal plant operation through original engineered life with conversion to natural gas based on current costs and feasibility of other alternatives. Actual emission reductions and plant alternatives are subject to change with advancement of emissions reduction technologies.

Responsibly Reducing GHG Emissions

Integrating Renewables and Delivering Cleaner Critical Generating Capacity

Electric Operations: Evaluate cost-effective addition of new renewables and battery storage; convert to gas or replace coal at end of engineered lives

Natural Gas utilities: replace at risk materials, integrate new leak detection and other technologies, improved processes and renewable natural gas

Note: Goals are based on reduction in greenhouse gas emissions intensity since 2005. Achievement of these goals assumes coal plant operation through original engineered life with conversion to natural gas based on current costs and feasibility of other alternatives. Actual emission reductions and plant alternatives are subject to change with advancement of emissions reduction technologies.

Recent Highlights and Key Initiatives

READY TO SERVE

One of our employees in Cheyenne, Wyoming, works on a recently replaced natural gas meter.

YTD 2021 Highlights

Strong financial performance

- ✓ Financial discipline; strong liquidity, cost control and cash conservation
- ✓ Customer growth accelerated by population migration
- ✓ Power marketing and mark-to-market gains on higher energy prices

51 consecutive annual dividend increases

- ✓ Dividend increased 5.3%, achieves 51 consecutive years of increases

Operational excellence

- ✓ Excellent system performance and resilience during Winter Storm Uri and summer record electric system peaks in South Dakota and Wyoming
- ✓ \$678 million capital plan on track

Regulatory achievement and progress

- ✓ Settlements for Colorado and Kansas natural gas rate reviews and safety-focused investment riders
- ✓ Winter Storm Uri recovery progress; all plans filed and approvals reached in multiple states

Resiliency, efficiency and growth development

- ✓ Electric integrated resource plan filed in South Dakota and Wyoming
- ✓ *Ready Wyoming* announced - 285-mile electric transmission expansion project
- ✓ Partnership with peers to explore organized wholesale market in western interconnect
- ✓ Blockchain request for proposals – robust response

Enhanced ESG reporting

- ✓ Enhanced ESG reports; new SASB and NCSI disclosures and updated sustainability report
- ✓ Methane emissions reduction goals reinforced by joining ONE Future Coalition
- ✓ Emissions reduction technology support; hydrogen pilot project, carbon capture research and clean energy ventures investment partnership

Regulatory Progress

Rate Review Jurisdiction	Filing Date	Annual Revenue Increase	ROE	Debt / Equity	Comments / Status
 Colorado Gas Proceeding 21AL-0236G	June 1, 2021	\$6.49 million	9.20%	49.74% / 50.26%	Settlement agreement reached for new rates effective Jan. 1, 2022
 Colorado Gas Rider	Sept. 11, 2020	<i>n/a</i>			Final order received on July 6 for approval of 3-year safety-focused investment rider starting Jan. 1, 2022
Kansas Gas Docket 21-BHCG-418-RTS	May 7, 2021	Global Settlement			Settlement agreement reached for renewal of 5-year investment rider; net neutral base rate impact for customers
Iowa Gas Docket RPU-2021-002	June 1, 2021	\$8.3 million *	10.15% *	49.99% / 50.01% *	Interim rates effective June 11 with settlement discussions underway; seeking final rates in Q1 2022

Winter Storm Uri Incremental Cost Recovery Jurisdiction

Recovery Period

Comments / Status

Arkansas Gas	5 years *	Recovery plan filed; interim rates effective June 1
Colorado Gas	3 years *	Recovery plan filed
Colorado Electric	2 years *	Settlement discussions underway
Iowa Gas	3 years *	Recovery plan filed; interim rates effective April 9
Kansas Gas	5 years *	Settlement discussions underway
 Nebraska Gas	3 years	Approved; rates effective July 1

 Wyoming Gas	3 years	Settlement agreement reached for rates effective Jan. 1, 2022
 Wyoming Electric	1 year	Recovery through normal energy cost adjustment

* As requested in filing

South Dakota and Wyoming Electric Integrated Resource Plan*

Roadmap to Reliable, Cleaner and Cost-Effective Grid of the Future

Add 100MW of renewable generation

Convert 90MW coal generation to natural gas in 2025

Evaluate 20MW of battery storage

Maintain cost-effective, reliable capacity through engineered life

Evaluate and develop transmission opportunities

Support research for emissions-reducing technologies

* Preferred plan as submitted to South Dakota Public Utilities Commission and Wyoming Public Service Commission

Ready Wyoming

285-mile electric transmission project to further interconnect and expand our Wyoming Electric system

- Q1 2022 – filing for approval of multi-phase construction project to commence in early 2023

Long-term benefits for our customers, communities and shareholders

- Resiliency – expanded access to greater diversity of resources
- Optionality – expanded access to power markets
- Growth – attract and enable customer solutions such as serving data centers, blockchain and economic growth in Wyoming
- Cleaner profile – expanded access to renewable resources and facilitating additional renewable development across wind- and sun-rich resource area with strong natural gas optionality to back up renewables

- Black Hills' SD/WY and Cheyenne electric system and service area
- ▭ Proposed transmission lines

Financial Overview

READY TO SERVE

Safety is one of our values and a top priority in all we do.

Q3 2021 Financial Review

**EPS available for
common stock
(GAAP)**

**EPS, as adjusted
(Non-GAAP)***

* EPS, as adjusted is a non-GAAP measure which is reconciled to GAAP in the Appendix

Q3 2021 Earnings Drivers

Change in Net Income Available for Common Stock

- ▲ New rates
- ▲ Customer growth and usage
- ▲ Mark-to-market gains ¹
- ▲ Prior year COVID-19 impacts
- ▲ Lower non-service pension and benefit plan costs
- ▼ Higher depreciation on larger asset base
- ▼ Higher debt balance
- ▼ Weather ²

¹ Mark-to-market gains were \$0.08 in EPS for Q3 2021, which was a \$0.08 favorable variance compared to Q3 2020

² Weather was comparable to normal but a negative EPS impact of (\$0.05) versus Q3 2020

Five-Year Earnings Outlook

Increased lower end of 2021 guidance by \$0.05 on Nov. 2, 2021

* EPS available for common stock, as adjusted, a non-GAAP measure; see Appendix for non-GAAP to GAAP reconciliation and guidance assumptions

Solid Financial Position

Committed to Strong Investment-Grade Credit Ratings

Credit Ratings

² Total case incident rate is defined as the average number of work-related injuries incurred per 200,000 hours worked during a one-year period (2019 utility industry average of 2.2)

³ Reduction goals of 70% by 2040 for electric operations and 50% by 2035 for gas utilities off a 2005 baseline

Appendix

- Business Overview
- Regulatory
- Capital Investment
- Environment, Social and Governance
- Other Financial Information, Non-GAAP information and reconciliations
- Earnings Guidance Assumptions
- Strategic Objectives, Values & Mission

Operations Overview

Electric Utilities, Power Generation & Mining*

- Three electric utilities which generate, transmit and distribute electricity to approximately 216,000 customers in CO, SD, WY and MT
- 1.4 gigawatts** of generation and 8,892 miles of transmission and distribution
 - Five power generation facilities owned by utilities and serving utility customers (992 megawatts)
 - Three power generation facilities delivering capacity and energy under long-term contracts to utility affiliates (423 megawatts**)
 - Efficient mine-mouth generation in WY fueled by low-sulfur Powder River Basin coal (49-year supply of reserves at current production); mine production contracted to on site generation
- East-West interconnection in SD optimizes off-system sale of power and improves system reliability (1 of only 7 east-west interconnections in U.S.)

Natural Gas Utilities*

- 7 natural gas utilities^ which distribute natural gas to approximately 1,083,000 customers in AR, CO, IA, KS, NE and WY
- 4,774 miles of intrastate gas transmission pipelines and 41,838 miles of gas distribution mains and service lines
- Seven natural gas storage facilities in AR, CO and WY with 16.5 Bcf of underground gas storage working capacity
- 52,000 customers served through Choice Gas Program (unbundled natural gas supply)

* Information from 2020 Form 10-K Annual Report Filing as of Dec. 31, 2020

** Includes 49.9% third party ownership of Black Hills Colorado IPP reported as noncontrolling interest

^ Excludes minor entities and Shoshone pipeline

Operational Excellence

⚠️ Safety-Focused Team

OSHA awarded coveted VPP Star Status, its highest worksite safety status, to Cheyenne Prairie Generating Station

Cheyenne Prairie Generating Station team members proudly display the VPP (Voluntary Protection Program) Star Status banner. Achieving VPP Star Status requires a rigorous, multi-year audit and approval process to be recognized as exemplary leaders in safety. This includes demonstrating a clear focus on both prevention of hazards and continuous improvement of safety and health management systems.

🔍 Positive Customer Experience

- Black Hills' natural gas utility in South Region achieved second overall JD Power ranking, top Safety and Billing & Payment rankings and highest increase in overall satisfaction year-over-year
- Net promoter score improvement; 64 year-to-date versus 42 in 2017

»»» Industry-Leading Reliability

All three electric utilities achieved SAIDI outage results better than 55 minutes in 2020 (top-quartile)

Great Workplace

Achiever's 50 Most Engaged Workplaces®
(second consecutive year)

Veteran-Friendly Employer of the Year
(2021 Wyoming Safety and Workforce Summit)

Strong employee engagement survey scores in 2021
particularly in safety, values and management effectiveness
(Third-party anonymous survey as compared to peers)

Diverse Mix of Customer Class

Electric Utilities Mix of Residential, Commercial and Industrial

Electric Utilities Revenue*

Gas Utilities Primarily Residential and Commercial

Gas Utilities Revenue*

* Information from 2020 10-K filing for year ending Dec. 31, 2020

Integrated Electric Utility

Power Generation and Mining

- 992 MW of utility-owned generation capacity
- 423 MW of generation capacity owned by Power Generation; 335 MW contracted to Electric Utilities

Gillette Energy Complex

- 745 megawatts of mine-mouth generation on site (partially owned by third parties)
 - Efficient coal delivery under life of plant contracts
 - Fixed price plus escalators serving 450 MW
 - Cost Plus Return serving 295 MW
- (See mining contracts summary for more detail)

Cheyenne Prairie

- Combined- Cycle Gas-Fired Plants
 - 95 MW – 2014 (100% owned: 58% SDE / 42% WYE)
- Gas-fired Combustion Turbine
 - 37 MW – 2014 (100% owned by WYE)

Pueblo Airport Generating Station*

- Combined- Cycle Gas-Fired Plants
 - Two 100 MW Plants – 2012 (50.1%* owned by Power Generation with 20-yr PPA to COE)
- Simple Cycle Gas-Fired Plants
 - Two 90 MW plants – 2011 (100% owned by COE)
- Gas-Fired Combustion Turbine
 - 40 MW – 2016 (100% owned by COE)

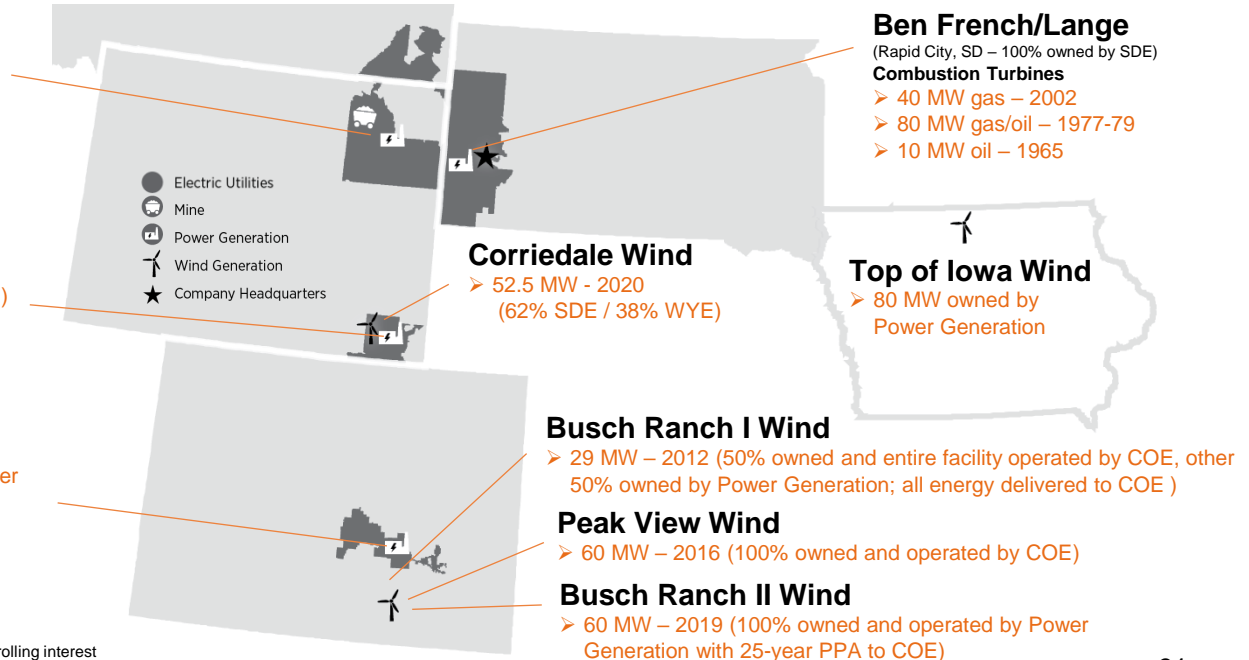

* 49.9% third party ownership of Black Hills Colorado IPP reported as noncontrolling interest
 Note: information from 2020 Form 10-K Annual Report Filing as of Dec. 31, 2020; totals approximated

Transmission Network

- 1,872 miles of electric transmission in SD, WY and CO

Distribution Systems

- 7,020 miles of electric distribution in SD, WY and CO

Full Service Natural Gas Utility

Gas Supply

- Diverse procurement sources and hedging programs
- 560 miles of gathering lines

Storage and Transmission

- 4,800 miles of intrastate transmission
- 49,000 horsepower of compression
- 7 natural gas storage sites in AR, CO and WY with over 53 million Mcf total capacity
- 149 million Dth natural gas transported in 2020

Distribution

- 30,000-mile natural gas distribution system
- 1.1 million customers with 12,000 miles of service lines
- 98 million Dth natural gas distributed to customers in 2020

Natural Gas Infrastructure

Risk-Assessed Replacement of At-risk Materials

Replacing aging infrastructure to harden and modernize systems

Natural Gas Utilities

Replacing at-risk materials and modernizing to maintain and enhance system integrity

Electric Utilities Capital Investment

Five-year Forecast of \$1.2+ Billion Focused on Safety, System Integrity and Growth

64% with Timely Recovery*

Forecasted Capital by State

* Growth Capital - generates immediate revenue upon customer connections
 Minimal Lag Capital - capital expenditures with regulatory lag of less than one year or incurred during expected regulatory test periods
 Rider Eligible Capital - capital expenditures recovered through state specific tariffs or FERC formula rates and meets Minimal Lag Capital definition

Natural Gas Utilities Capital Investment

Five-year Forecast of \$1.9+ Billion Focused on Safety, System Integrity and Growth

89% with Timely Recovery*

Forecasted Capital by State

* Growth Capital - generates immediate revenue upon customer connections
 Minimal Lag Capital - capital expenditures with regulatory lag of less than one year or incurred during expected regulatory test periods
 Rider Eligible Capital - capital expenditures recovered through state specific tariffs and meets Minimal Lag Capital definition

Environmental, Social and Governance

With the completion of the Corriedale Wind Energy Project, shown here, Black Hills Corp. now owns and operates 281 megawatts of renewable wind generation.

Sustainable ESG Profile

Environmental

- 88% coal-free total revenue*
- Reducing GHG emissions intensity 40% by 2030 and 70% by 2040 for electric operations and 50% by 2035 for gas utilities
 - Adding renewables resources
 - Replacing aging and at-risk materials
 - Supporting research, including emissions reducing options such as hydrogen
 - Reducing methane emissions beyond requirements

Social

- Safety culture
- Supporting community development
- Donations and volunteerism
- Diversity and inclusion programs, including commitment to multiple EEI diversity goals
- Highly engaged team
- Continuous improvement

Governance

- Independent, diverse and experienced directors
- Stock ownership requirement and compensation philosophy
- Well-established succession planning process with Board engagement
- ESG board oversight

* Revenue as a percent of total company revenue as of Dec. 31, 2020

Supporting Emissions-Reduction Technologies

Evaluating feasibility of hydrogen use and production via natural gas generation plants

- Blue hydrogen: natural gas generator with carbon capture
- Green hydrogen: natural gas generator fed with renewable energy and water
- Study engineering modifications required for a General Electric LM6000 combustion turbine generator to accommodate a blended fuel mix of hydrogen and pipeline natural gas.
- Partnering with GE, Black and Veatch, and Tallgrass Energy; Wyoming Energy Authority awarded the project to Black Hills' natural gas generation
- Study to take place Q4 2021 - Q3 2022

Pilot project to develop carbon capture, utilization and storage (CCUS) to reduce emissions for coal generation plants

- CCUS project to be installed on coal-fired power plant at Black Hills' Gillette Energy Complex
- Partnering with Sustainable Energy Solutions, Sargent Lundy and Denbury Resources
- Wyoming Energy Authority to make final project proposal selection in early 2022

New Venture Capital Fund to support ESG efforts in natural gas utilities

- Fund will concentrate on sustainability, reliability, and resilience imperatives for natural gas utility sector
- Focus on early-stage ESG investments in decarbonization, renewable natural gas, hydrogen and other clean energy solutions.

Reviewing potential to join NSF IUCRC Center for Solid-State Energy Storage consortium

- Collaboration between several universities, National Science Foundation and industry to develop solid-state battery technologies

Responsibly Integrating Renewable Energy

Total Electric Generation Capacity *

Current Capacity Mix *

(Dec. 31, 2020)

* Total Black Hills ownership comprised of utility-owned capacity and capacity owned by Power Generation segment, which includes 49.9 percent ownership in Colorado IPP by a third party representing approximately 100 megawatts; excludes power purchase agreements from third parties

Renewable Ready Subscription Program

Responsibly Added Renewable Resources for South Dakota and Wyoming

Innovative Solution to Benefit Customers

- Subscription-based program provides access to renewable energy while keeping larger customers connected to Black Hills' systems
- Utility scale provides more attractive economics than distributed renewable projects
- Initial 40 megawatts expanded to 52.5 megawatts on strong customer demand

Program Supplied by Corriedale Wind Project

- 52.5-megawatt wind farm placed in service in December 2020 in Wyoming
 - Jointly-owned asset of South Dakota and Wyoming electric utilities
 - Added “power-up” technology to improve efficiency

52.5-Megawatt Corriedale Wind Energy Project near Cheyenne, Wyoming

Renewable Advantage

Responsibly Expanding Renewable Resources in Colorado

Supporting Emissions Reduction Goals

- Responsibly add renewable energy resources for the benefit of customers and communities
- Request for proposals for up to 200 megawatts of cost-effective, utility-scale renewable resources including wind, solar or battery storage to be in service by year-end 2023

Strong Bid Response with Low Energy Costs

- 200-megawatt solar project to be constructed in Pueblo County, Colorado, is projected to:
 - Save customers \$66 million over 15 years
 - Provide \$178 million in direct and indirect economic benefits through state and local taxes, federal taxes
 - Increase Colorado renewable energy mix above 50% and significantly reduce carbon emissions in Colorado by approximately 70% since

Social Responsibility

Safety Focus

Dedicated "Ready" Safety Culture

- TCIR better than industry average and 47% improved since 2014
- OSHA Voluntary Protection Program Star Status at both Cheyenne Prairie Generating Station *and* Pueblo Airport Generating Station
- Strong safety culture including trainings and stop work authority
- Crisis response full-scale mock drills and response plans

⚠ Total Case Incident Rate*

Great Workplace

Engaged and Inclusive

- Achievers 50 Most Engaged Workplaces (2019 and 2020)
- InHersight's 20 Best Utility Companies to Work For (2019)
- Diversity and inclusion programs
 - Aspire employee resource group for women
 - Veteran's engagement team (VET)
 - Multicultural Team for racially/ethnically diverse employees
 - New Connections resource group for new employees
- Support of the Guard and Reserve (ESGR) supporting civilian employment of national guard members
- Department of Labor's Gold Medallion Award for veteran employment (2020)

Community Support

Developing Thriving Local Economies

- \$1.38 billion direct economic impact**
- Local economic development, community sponsorships
- Culture of encouraging volunteerism
- Black Hills Cares energy assistance
- Employee United Way contributions
- Donations to local nonprofits responding to COVID-19 needs
- Tree giveaway programs

In 2020, charitable support for our communities totaled \$5.6 million, including \$628,000 by employees to 50 United Way organizations across our states

* TCIR is defined as the average number of work-related injuries incurred per 200,000 hours worked during a one-year period (represents approximately 100 workers)

** 2020 estimated direct economic impact includes franchise fees, wages and benefits, property and other taxes, payments to suppliers, and other community impact

Pipeline Safety Leadership

Focused on the Safety of Our Co-workers, Customers and Communities

Black Hills' comprehensive, systematic effort at forefront of industry-wide goal of zero incidents

- Implementing Pipeline Safety Management System framework
- Sharing knowledge through industry leadership roles
- Enhancing emergency response and training
- Investing in technologies such as digital mapping and data collection, artificial intelligence and analytics

Governance

Diverse, Experienced Oversight and Alignment of Stakeholder Interests

Board Composition

- 36% of board members are gender or ethnically diverse
- Average Board tenure of 5.5 years
- 10 of 11 directors are independent
- Independent board chair
- Diverse experience across multiple industries and sectors

Corporate Governance

- Plurality plus voting policy
- Annual board and committee evaluations
- All board committees have authority to retain independent advisors paid for by company
- Code of Business Conduct applies to all employees and Board of Directors
- Code of Ethics for financial officers
- Hedging and pledging company stock prohibited
- Mandatory retirement age for directors
- Board engagement in succession planning process

Compensation Policies

- Maintain robust stock ownership guidelines for directors and executives
- Annual advisory vote on executive compensation
- Board authority to claw back incentive compensation
- Compensation philosophy aligns compensation practices with stakeholder interests

Other Information

READY TO SERVE

The expertise and dedication of our electric line workers keeps our service among the most reliable in the country.

Non-GAAP Financial Measures

Net Income Available for Common Stock and EPS, as adjusted

We have provided non-GAAP earnings data reflecting adjustments for special items as specified in the GAAP to non-GAAP adjustment reconciliation table in this presentation. Operating Income (loss), as adjusted, Income (loss) from continuing operations, as adjusted, and Net income (loss), as adjusted, are defined as Segment Revenue, Operating Income (loss), Income (loss) from continuing operations and Net income (loss), adjusted for expenses, gains and losses that the company believes do not reflect the company's core operating performance. The company believes that non-GAAP financial measures are useful to investors because the items excluded are not indicative of the company's continuing operating results. The company's management uses these non-GAAP financial measures as an indicator for evaluating current periods and planning and forecasting future periods.

Earnings per share, as adjusted and earnings from continuing operations, per share, as adjusted

Earnings per share from continuing operations available for common stock, as adjusted, and earnings from continuing operations, per share, as adjusted, are Non-GAAP financial measures. Earnings per share, as adjusted, and earnings from continuing operations available for common stock, per share, as adjusted, are defined as GAAP Earnings per share and GAAP earnings from continuing operations, adjusted for expenses, gains and losses that the Company believes do not reflect the Company's core operating performance. Examples of these types of adjustments may include unique one-time non-budgeted events, impairment of assets, acquisition and disposition costs, and other adjustments noted in the earnings reconciliation tables in this presentation. The Company is not able to provide a forward-looking quantitative GAAP to Non-GAAP reconciliation for this financial measure because we do not know the unplanned or unique events that may occur later during the year.

Limitations on the Use of Non-GAAP Measures

Non-GAAP measures have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Our presentation of these non-GAAP financial measures should not be construed as an inference that our future results will not be affected by unusual, non-routine, or non-recurring items.

Non-GAAP measures should be used in addition to and in conjunction with results presented in accordance with GAAP. Non-GAAP measures should not be considered as an alternative to net income, operating income or any other operating performance measure prescribed by GAAP, nor should these measures be relied upon to the exclusion of GAAP financial measures. Our non-GAAP measures reflect an additional way of viewing our operations that we believe, when viewed with our GAAP results and the reconciliation to the corresponding GAAP financial measures, provide a more complete understanding of factors and trends affecting our business than could be obtained absent this disclosure. Management strongly encourages investors to review our financial information in its entirety and not rely on a single financial measure.

2021 Earnings Guidance Assumptions

2021 EPS available for common stock is expected to be in the range of \$3.85 to \$4.00, based on the following assumptions, as listed on Nov. 3:

- Normal weather conditions within our utility service territories including temperatures, precipitation levels and wind conditions for the remainder of the year
- Normal operations and weather conditions for planned construction, maintenance and/or capital investment projects for the remainder of the year
- Completion of utility regulatory dockets
- No significant unplanned outages at any of our generating facilities other than Wygen I *
- Production tax credits of \$20 million associated with wind generation assets
- Equity issuance of \$100 million to \$120 million through the at-the-market equity offering program in 2021
- Capital investment of \$678 million in 2021
- No material net impact from COVID-19
- Constructive regulatory outcomes related to recovery of incremental Winter Storm Uri costs

* In September, the Wygen I power plant experienced an unplanned outage. The outage had a \$2.3 million negative impact to operating income in the third quarter and is expected to negatively impact fourth quarter operating income by approximately \$5 million.

2022 Earnings Guidance Assumptions

2022 EPS available for common stock is expected to be in the range of \$3.95 to \$4.15, based on the following assumptions, as listed on Nov. 3:

- Normal weather conditions within our utility service territories including temperatures, precipitation levels and wind conditions
- Normal operations and weather conditions for planned construction, maintenance and/or capital investment projects
- Completion of utility regulatory dockets
- No significant unplanned outages at any of our generating facilities
- Adjusted contract price for Wygen I power purchase agreement beginning Jan. 1, 2022
- Production tax credits of \$20 million associated with wind generation assets
- Capital investment of \$678 million in 2021 and \$611 million in 2022
- Equity issuance of \$100 million to \$120 million in 2021 and \$100 million to \$120 million in 2022 through the at-the-market equity offering program
- Constructive regulatory outcomes related to recovery of incremental Winter Storm Uri costs
- No material net impact from COVID-19
- Inflation in line with recent historical trends

Strategic Objectives

Profitable Growth

Achieve consistent growth that creates value

- Meet growing demand through innovative solutions and customer-focused, cost effective, rate-based utility assets
- Enhance reliability and satisfaction
- Acquire small utility systems within or near existing service territories

READY.

Valued Service

Deliver reliable and highly valued products and services

- Invest in infrastructure to maintain safety and reliability of electric and gas systems
- Cost effectively integrate additional renewable resources

Better Every Day

Continuously improve to achieve industry-leading results

- Achieve top-tier performance in a culture of continuous improvement
- Improve efficiencies through continued deployment of technology

Great Workplace

Promote a workplace that inspires individual growth and pride in what we do

- Be the safest company in our industry
- Be one of the best places to work
- Improve the wellness of employees
- Be a workplace of choice for women and minorities

Vision Be the energy partner of choice.

Mission Improving life with energy.

Company Values

Agility

We embrace change and challenge ourselves to adapt quickly to opportunities.

Customer Service

We are committed to providing a superior customer experience every day.

Partnership

Our partnerships with shareholders, communities, regulators, customers and each other make us all stronger.

Communication

Consistent, open and timely communication keeps us focused on our strategy and goals.

Integrity

We hold ourselves to the highest standards based on a foundation of unquestionable ethics.

Respect

We respect each other. Our unique talents and diversity anchor a culture of success.

Creating Value

We are committed to creating exceptional value for our shareholders, employees, customers and the communities we serve ... always.

Leadership

Leadership is an attitude. Everyone must demonstrate the care and initiative to do things right.

Safety

We commit to live and work safely every day.
